CE MARKING / CE CERTIFICATE

JETFLOAT MODULAR PONTOON SYSTEM

We, JETFLOAT INTERNATIONAL GmbH, confirm herewith that we are the genuine producers of the JETFLOAT modular pontoon system since 1974 (Patent no. 312 039) and that:

- A CE label is only necessary for products that are specifically mentioned in one or more EU directives.
- Products such as the modular floating pontoons, which are not subject to any EU directive, are not allowed to bear any CE label.
- This is the reason why the JETFLOAT products do not have any CE certification.

The AKG PLASTICS GMBH in A-8410 Wildon/Graz, Austria - our producer - and we, JETFLOAT INTERNATIONAL GMBH together certify that our JETFLOAT system is manufactured strictly according to the requirements of the ISO/TS 16949:2009 / ISO 9001:2008 standards.

This ISO/TS 16949:2009 certificate with current inspections and examinations also covers the survey of the fulfillment of the "Austrian Industrial Code" (österreichische Gewerbeordnung) and the obtainment of the operational approval for industrial production facilities (e.g. comprises building permissions, occupational health and safety, environmental laws, safety of machinery, labour laws, etc.).
