

JETfloat
INTERNATIONAL

JETFLOAT® International GmbH is Austria's and the world's leading manufacturer of modular floating elements made of the highest quality HDPE producing since 1971.

JETFLOAT® International is your partner and problem solver for all areas of application for floating pontoons, right up to turnkey systems.

UV stable and weatherproof

Due to the use of the best raw material available on the market and the strictly controlled production in our Austrian plant, Jetfloat elements withstand the strongest weather and sun rays and therefore have the longest product life.

Frost-proof

Jetfloat systems have been used and tested in the coldest countries in the world for decades. Without changing the appearance or the quality, they withstand the lowest temperatures and meet the desired requirements.

Impact resistant

Because of the material used, even heavy industrial loads, heavy machinery and long-term tourism cannot change the shape and the quality of our pontoons. Numerous tests prove the endurance of the Jetfloat systems.

Rotting-proof & food-safe

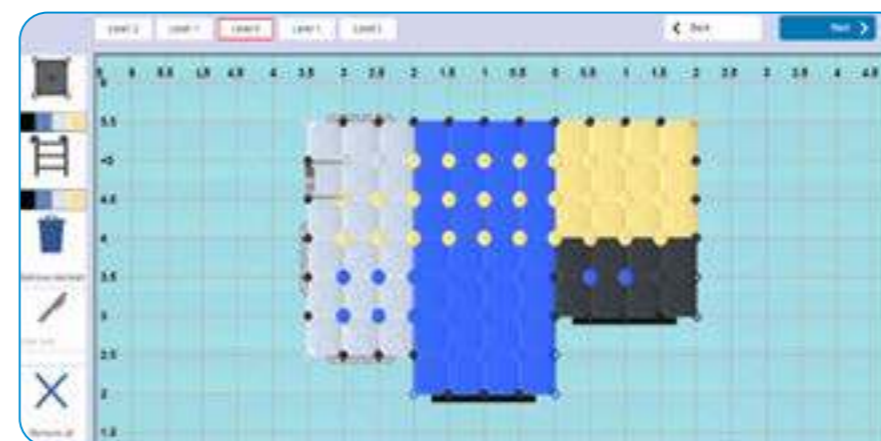

The Jetfloat elements are made of certified material Lupolen 5261 Z, which is demonstrably rot-proof and food-safe.

Salt water and acid resistant

The special HDPE formulation, compliance with the highest standards and controlled production of Jetfloat elements are a guarantee for the provenly best and thoroughly tested resistance to salt water and acid.

JETFLOAT® CONFIGURATOR

Create your custom platform with just a few clicks

Jetfloat configurator

Scan the QR code above to get to our configurator and build a virtual Jetfloat platform in a few minutes. You can change colors, add or remove elements, choose from different accessories, and play around with shapes and sizes. Once you finish your custom Jetfloat configuration, you will receive a pdf file with a drawing and a reference number. Your local Jetfloat representative will get in contact with you to help you finalize a best offer for your custom Jetfloat platform.

AREAS OF APPLICATION

Areas of Application of Jetfloat Elements

INDUSTRY

Working platforms for heavy machinery, pontoon bridges for trucks, aquaculture, mining, or other areas.

- Working Platforms
- Pontoon Bridges
- Aquaculture
- Mining
- Photovoltaics
- Other technical areas

LEISURE

Platforms for swimming, hotels, marinas. Built-in pools, sports facilities and much more for an upgrade in tourism.

- pools
- hotels
- Marinas
- Bathing platforms
- Cruises

EVENTS

Stages that can be set up quickly for concerts, sports platforms, pyrotechnics, advertising spaces on the water, and more events.

- Stages
- Sports
- Pyrotechnics

INDUSTRY

Jetfloat makes the industry float

Tons of heavy machinery on the water? No problem with Jetfloat International. The maximum load-bearing capacity of single-layer platforms, built from elements of the JETFLOAT modular pontoon system, in the water is 350 kg / m². The load-bearing capacity is multiplied by adding more layers. Through decades of practical use and through the use of special additives, certified pontoons are made of the best material for the modular industry, weatherproof, frost-proof, UV-stable, impact-resistant, rot-proof, food-safe, saltwater-resistant, acid-resistant and low-maintenance.

Working platforms

Heavy duty platforms for industry.

Aquaculture

Modular walkways and platforms for fish feed.

Mining

Floating platforms for the mining industry.

Pontoon bridges

Modular bridges that can be quickly set up for all purposes.

Photovoltaics

Modular solutions for photovoltaics on the water

Other technical areas

There are endless possibilities with Jetfloat.

Military

Transportation solutions for heavy equipment

LEISURE

Jetties, marinas, aqua parks, swimming and much more

Storage for boats or jet skis, bathing, jumping, rowing and countless activities provide **Jetfloat modular pontoons**. Quickly built bridges or platforms that offer top quality for decades. In many countries there are various tourism and sports objects on Jetfloat platforms. With the modular Jetfloat system, pools are built in salt and fresh water and **offer infinite bathing fun for all generations**.

Hotels

Hotels always offer something new for their guests with Jetfloat systems.

Bathing platforms

Jetfloat has been offering **modular pontoons for bathing fun since 1971**

Pools

Safe bathing in the seas, lakes or rivers without water costs.

Marinas

Modular docks for best quality marinas.

Cruises

With Jetfloat you can bring cruising tourists to the smallest, never before discovered islands .

EVENTS

The best cultural or sporting events on the water

Weddings that everyone will remember forever. Cultural events in a natural atmosphere without comparison. With the modular Jetfloat system, you can quickly build a heavy-duty platform on land, at sea, on the river or at sea. A car as an advertisement on the water or a scaffold for promotional areas. Jetfloat platforms carry more than one ton per square meter. Jetfloat systems offer creative bank designs for sports events and can serve as sports areas for all sports.

Jetfloat sport platforms

Modular platforms suitable for various sporting events. Swimming, golf, rowing, and much more.

Jetfloat stages

Pontoon stages for concerts, cultural and other events.

Jetfloat Pyrotechnics

Rapidly deployable platforms suitable for safe pyrotechnic shows.

FLEXIBILITY & CREATIVITY

UNCOMPROMISINGLY FLEXIBLE

Our customers use **JETFLOAT** pontoons for working platforms, bathing jetties, boat launching, leisure facilities or floating stages. The pontoons are also used for fish farming or photovoltaic systems.

No floating application excludes the other. Everything is compatible. Our customer never makes a wrong purchase decision regarding application or size. The **JETFLOAT system** can be expanded, changed, or converted into any shape at any time in 50 cm increments.

As quickly as the system is set up, it can be dismantled again quickly. Even after 50 years, new **JETFLOAT** parts still fit your old **JETFLOAT system**.

Due to the durability, the **JETFLOAT** elements achieve a very high resale value.

ALLOWS CREATIVITY

Special places are created with Jetfloat

JETFLOAT® floating elements are widely used in the areas of dock facilities for events, water sports associations, marinas, bathing facilities, work platforms, fish farming.

JETFLOAT® modular systems are characterized by an attractive design, solid quality, simple self-assembly and sophisticated problem solutions.

TECHNOLOGY The best material for floating pontoons

Thanks to our many years of experience in production, the JETFLOAT system guarantees you many advantages and first-class quality.

+ Production process:

Our parent company AKG produces all Jetfloat elements. Production process certified by

ISO 9001: 2015

IATF 16949: 2016

+ Experience:

Experience in production and application since 1971.

JETFLOAT@INTERNATIONAL elements are made from the raw material **LUPOLEN 5261 Z**, a special high-density polyethylene (HD-PE). The manufacturer's production certificate, confirms that this raw material is also produced strictly according to ISO 9001 standards.

THIS MATERIAL IS THE MOST SUITABLE FOR MODULAR PONTOON SYSTEMS.

All JETFLOAT elements and connecting bolts are blown from 100% pure Lupolen 5261 Z. No recycled material is used as it will decay in the sun and water within a few years

ELEMENTS & ACCESSORIES

JETFLOAT® SINGLE ELEMENTS

Colors: Black, Light blue, Light gray, Sand

JETFLOAT® DOUBLE ELEMENT

Colors: Black, Light blue, Light gray, Sand

JETFLOAT® SINGLE ELEMENT - LOW

Colors: Black, blue, light gray

JETFLOAT® CONNECTING PIN SHORT

Colors: Black, light blue, light gray, sand

JETFLOAT® CONNECTING PIN LONG

Colors: Black, light blue, light gray, sand

JETFLOAT® SINGLE SPACER, DOUBLE SPACER

Colors: Black

JETFLOAT® ELEMENTS & ACCESSORIES ARE:

- UV stable and weatherproof
- Frost-proof
- Impact tough
- Rotting-proof & food-safe
- Salt water and acid resistant
- Low maintenance

PONTOON MATERIAL:

LUPOLEN 5261 Z, high molecular plastic (HD-PE). Processing of 100% pure material, no addition of recycling materials.

TEMPERATURE RESISTANCE:

-60°C to +80°C

JETFLOAT® SIDE SCREW CONNECTOR WITH NUT

Colors: black, white

JETFLOAT® SIDE SCREW CONNECTOR 290,560

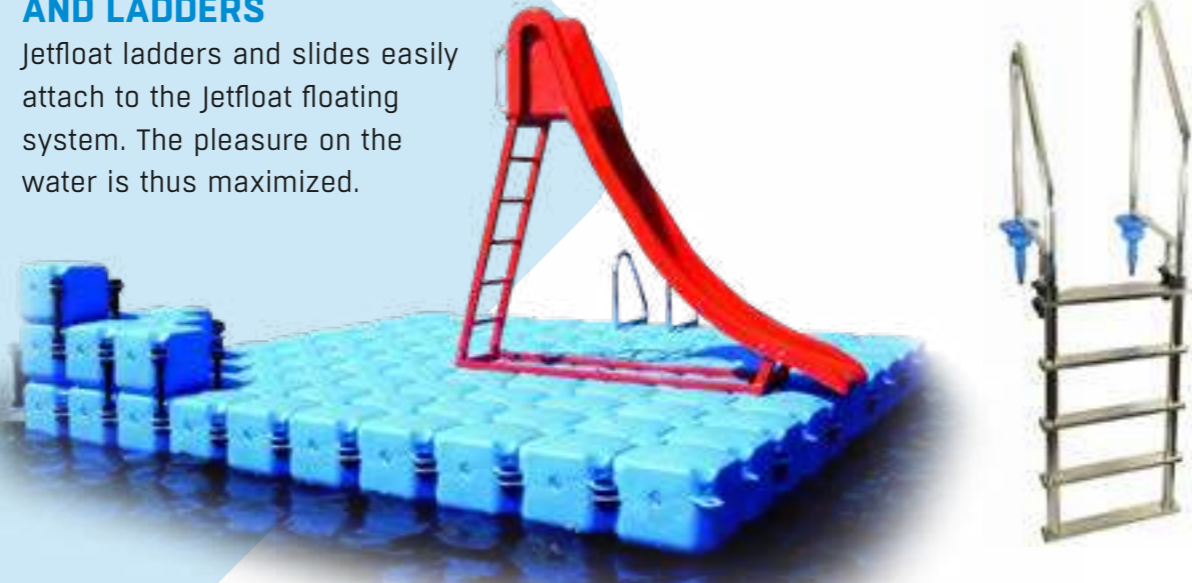

Colors: black

ELEMENTS & ACCESSORIES

JETFLOAT® BATHING SLIDES AND LADDERS

Jetfloat ladders and slides easily attach to the Jetfloat floating system. The pleasure on the water is thus maximized.

JETFLOAT® FENCES

BUILD YOUR OWN FENCE ON JETFLOAT SYSTEM

Easy to attach guardrail posts, available in a variety of sizes and materials.

JETFLOAT® ANCHORING SOLUTIONS

Secure the Jetfloat platform to the existing ground or anchor it. High quality steel is used for the Jetfloat anchor shackle.

JETFLOAT® ASSEMBLY

The assembly of a Jetfloat system is as easy as playing with children's blocks.

Visit our internet site for videos that show the assembly step by step.

JETFLOAT® GANGWAYS

We can build you a customized bridge to your Jetfloat platform. Check out the gallery on our website.

JETFLOAT® FENDERS&SIDE BARS

Protective side bars in steel or polyurethane which can be easily joined to Jetfloat elements. Choose from a variety of lengths and colors.

DECKING

Full solutions with best quality decking

Decking products designed for **style and durability**, that are easy to use and convenient to maintain. **Designed for versatility, our outdoor decking, tile, paver, turf and framing products** bring additional value to the Jetfloat system.

WPC

At Jetfloat, WPC planks are available in the form of three branded products:

FANO UltraShield by NewTechWood, Twinson and FANO WPC.

WPC (Wood Plastic Composites) sind im Outdoor-Bereich eines der Erfolgsprodukte der letzten Jahrzehnte. Sie bestehen aus einer thermoplastisch verarbeiteten Mischung aus Biomaterialien (z.B. Holzfasern oder Holzmehl) und Kunststoff und verbinden die Vorteile beider Werkstoffe.

Ceramic plates

**Modern, resistant and the perfect one
Complement to WPC or wood**

Ceramic plates are trendy. They look modern, stylish and "clean" and give your pontoon an extraordinary flair. Due to the beautiful, delicate colors, the plates stay optically discreet in the background and still offer a perfect decking for your Jetfloat platform.

Wood

With a decking made of wood, you are investing in a piece of nature.

The charm of the real wood cover is unsurpassed. Whether on a bathing platform, marina or around the Jetfloat pool, the cover makes your favorite spot even more comfortable and offers you the right setting to relax, unwind and enjoy.

Artificial turf

The fresh green on your Jetfloat platform

The very natural-looking lawn decking conjure up naturally beautiful greenery on your pontoon all year round. The turfs are robust, heat, cold and UV-resistant, colorfast, water-permeable and quickdrying.

WHY JETFLOAT

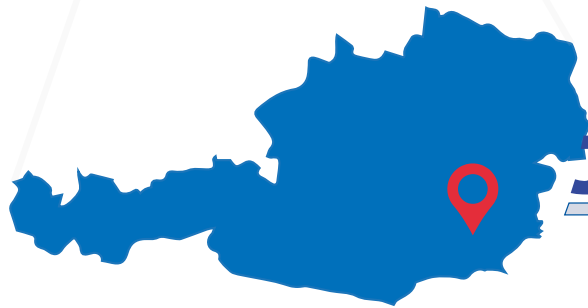

The best material for floating pontoons

- ◆ Competence of the dealers (advice, sales, technical know-how, anchoring solutions, ready-to-use installations, supervision of the assembly);
- ◆ Manufacturing and warehouse in Austria
- ◆ Immediate delivery from stock of elements and accessories in all basic colors
- ◆ Logistics service from the factory to the customer
- ◆ Some dealers have local storage
- ◆ Large selection of accessories
- ◆ Extremely durable product systems in use since 1971
- ◆ Qualified and experienced project support
- ◆ JETFLOAT INTERNATIONAL stands for the highest quality
